RE: Availability of Asbestos Management Plan

Dear Parents, Teachers, and Employees,

In October 1986, the U.S. Congress enacted the Asbestos Hazard Emergency Response Act (AHERA). Under this law, comprehensive regulations were developed to address asbestos problems in public and private elementary and secondary schools. These regulations require all schools to inspect for friable asbestos, develop asbestos management plans that address asbestos hazards in school buildings and implement response actions in a timely manner.

These regulations assign schools many new responsibilities. Our program for fulfilling these responsibilities is outlined in our asbestos management plan. This plan contains information on our initial inspection. The results of a document review and the initial asbestos inspection showed that asbestos containing materials (ACM) were not observed in the school.

You can review this plan at the Chesapeake Science Point Public Charter School, at 7321 Parkway Drive South, Hanover, Maryland 21076, during normal business hours, within (5) working days of receiving a request for inspection.

Please do not hesitate to contact me if you have any questions about reviewing our management plan or about planned or in progress asbestos related activities.
